

**LETTER OF INTENT TO JOIN
CHILDREN'S ENVIRONMENTAL HEALTH COLLABORATIVE**

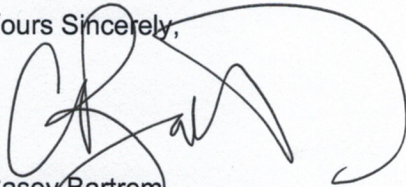

It is with great pleasure that I write this letter for TerraGraphics International Foundation (TIFO) to join the Children's Environmental Health Collaborative. This letter summarizes TIFO's commitment to protect children from the impacts of climate change and environmental degradation, a commitment that is deeply ingrained into our mission, vision and values.

As part of our contribution to the Collaborative, we commit to the following activities.

1. Advocate for prioritizing children's environmental health in international forums, including through joint co-branded communication and advocacy products, when feasible;
2. Advance programs with government, humanitarian, NGO, and academic partners that prioritize environmental health for children globally;
3. Contribute applied research on the impacts of climate change and environmental degradation on children's health to inform interventions that improve health outcomes for vulnerable populations;
4. Share guidance, tools, and best practices based on TIFO's experiences in diverse projects and contexts with the goal of protecting children from these environmental health risks;
5. Provide technical assistance, expertise, and resources on children's environmental health; and
6. Participate in joint convenings and promote coherent approaches to protecting children's environmental health, to the extent that we are able.

We will be honored to join the Collaborative, learn from other members, and bring our experiences and expertise to the group. We agree to have our logo displayed amongst the list of partners on the Collaborative's website and updated brochure, and work with UNICEF to advance children's health, development, and well-being.

Yours Sincerely,

Casey Bartrem
Executive Director
TerraGraphics International Foundation
