LETTER OF INTENT TO JOIN  
CHILDREN'S ENVIRONMENTAL HEALTH COLLABORATIVE

It is with great pleasure that I sign on to the Children's Environmental Health Collaborative. This letter indicates Ministry of Health and Populations Yemen's commitment to protect children from the impacts of climate change and environmental degradation.

As part of our contribution to the Collaborative, we commit to the following activities.

1. Advocate for prioritizing children's environmental health in international forums by sharing Yemen's experiences and developing case studies on environmental impacts on Yemeni children's health.
2. Contribute research on climate change and environmental impacts on children's health, focusing on issues like water scarcity, air pollution, and climate-related disasters, while developing locally-adapted protection guidelines.
3. Provide technical expertise on addressing climate-exacerbated malnutrition and implementing community-based interventions in resource-limited settings.
4. Participate in joint efforts to develop strategies for fragile states facing environmental challenges and integrate children's environmental health into humanitarian response plans.
5. Strengthen national capacity by establishing a database on children's environmental health indicators and training healthcare workers on related risks.
6. Promote cross-sectoral collaboration through a national task force and integrated programs addressing both immediate health needs and long-term environmental resilience for children.

We agree to have our logo displayed amongst the list of partners on the Collaborative's website and updated brochure, and working with UNICEF to advance children's health, development and well-being.

Prof. Dr. Qasim Muhammed Buhaibah  
Ministr of Public Health & Population
